Methodology and cautions

2024 baseline: certified Elections BC Statement of Votes. 2026: official Elections BC Party Report at the exact timestamp shown above. Only valid votes are used in party-share calculations; rejected ballots are excluded. Provincial participation uses ballots considered divided by registered voters reported by Elections BC.

Percentage-point swing = 2026 valid-vote share minus 2024 valid-vote share. Changes in aggregated party shares cannot establish how any individual voted. Current leaders are provisional; no candidate has yet been declared elected by Elections BC for the 2026 election.

The workbook includes all 93 districts, historical snapshots, source links and a new November 7-to-8 change log. This independent analysis is not an Elections BC publication.
